Objectives of Christcoin:

1. Connect every Christian on Earth (this includes Catholics, Protestants, Orthodox, Asian Christians, African Christians, Latins, etc). All of them no exceptions.
2. Create for them an economy and ecosystem.
3. Enhance the security and trust in their finances. Give them other options for interacting financially with their world.
4. To convert the sum total of man to Christianity. (How do we do this? I want to put powerful tools in Every Protestant Church, Roman Church, Orthodox Churches, etc corner).
5. To Channel all the untapped potential of man through the most productive religion on Earth.
6. To Establish several outside solar system and KYBER and TIBER belt colonies. Aka Space Christians.
7. To Expand Humanities population 1000x fold and standardize his processes and his maximum potential.
8. To make way for Jesus Christ to unite all churches of man!

Lord Christ Jesus save us all!

Various Roles: **May change**

Governance:

Global Council: 3 tier elections + vetting process.

Three Ring/Sphere Governance System.

1st Ring

Core Team – Made of Dev. Team and Close Associations

Potential room for Key Actors.

Core Soft Forking and Maintenance.

Upgrading “keys”?

Kings Rule – Ugly Judges with Pretty hats

2nd Ring

Lieutenants according to geography and key groups.

Must be vetted by Kings and Chief Patron.

Serve as Elect. Voted by Electors.

Steering Soft Forking and form a core pool of Developers.

Maintenance.

Pretty Rule – Must wear the Whig. One wears the Jesters Hat.

3rd Ring

Serve as Electors.

Industry Experts.

Vetted for Religiosity.

Vote in the 2nd ring

May serve as Town Criers to garner attention for the community.

Mob Rule – May Elect 17 Fools that serve to hold Morale/Whip

Each sphere has a voice, potentially a whip (or competing whips), must adhere to basic standards of due diligence and civility, can be mean to get the truth out. I prefer an ugly screaming truth over a silent knife any day. The lower house may battle it out. The upper house may join in, but I'd advise to be smart about which battles you pick.

Each sphere must hold a key office to routinely update and log and present to the community a full tallied list of importance on which matters must be discussed and implemented.

This is not a parliamentarian score. Not exactly. Pirates, meet Horde, Meet Thieves, Meet Priests, Meet the out-crowd, meet killers. All Homeless men and women until we return home to our Lord.

Binding Actions: Parlay, Town Cry, Bully Pulpit, Debate, Discourse, Vote Rules, Ledger Fools, Jester, Farter, Pirate Boober, etc.

Think TF2, but we need to make certain productive things get done!

Elections:

The Kings Rule may 1st round veto elected. It will then go to the second round or a third. Tie Breakers by Bob or By appointment of Bob. To Serve the will of Bob. King Must honor the 3rd elections if results are similar to the first two elections. Must provide detailed explanation and a funny gaffe of silly reason why they can't win.

Jester Must Raise Morale, but also must scour the crowd to find whats important and funny it in. Make news. We need to bow out all the over Coin Captains. Tee Pee their houses, slash some tires, I didn't see it. It didn't happen.

Fools: Novel...untrustworthy...DO SOME WORK DO SOME Hurt. Make a party. Must preach once a week to a new crowd. Could get a Stipend? Idk.

Time In Office????

Challenges for Office May be appointed by the Jester and the Mob. But also by the Kings.

A duel (Non-Lethal) May decide who runs an office...but for how long?

Fools must be devote. And may be debated out of office depending on how devote they are. God must protect these men and their role.

Devils Decide...its a fun challenge.

Kings may rule who is Vulnerable. And that Vulnerable spot...has no legal right to protection and must suffer three trials to escape for a time Vulnerability.

Betrayal of the Mob.

Mob Reap. Requires three kings in Agreement. The Kings may force the duelings/challengings/ejections of up to a 1/3rd of the mob and a 1/5th of the Pretty....every Mob Reap. Mob Reap resets every 44 days.

Pretty...Must be the best and brightest and least tiresome. They may interact directly in personal company with the Kings. Must be afraid of the Kings.

Fear of the Jester: Challenge to the Jester. He must preform a funny man's act for the sake of the unity of our Army. If he fails. He may be redeemed and gets a saving vote. Otherwise. A new Jester must be chosen. However, he is not Removed from the Pretty.

He becomes...Pretty Wise.

Pretty Wise. May Challenge a King's Associate to join the Core Team.

Kings Gambit?????

The Core Team is Protected by Lord Christ Jesus. All the way through Prison do we ring them Clear.

Go to Prison. You can not lose your Job. King's in Prison may ask for redemption every 17 days. And ask for a general vote in their Favor every 77 days.

After three votes of Redemption in their Favor or one general vote. The King in Prison may ask for the community to assist in their Release.

Release of King. All Members of the Community are obligated by any means necessary to Save a King.

Save a King.

Noise Rule By King.

Noise Rule By Jester.

Noise Rule by 3 Fools Unified.

Noise can be Silent or Can be Loud.

Fools and Pretty can petition for Stipends for Conferences as well as Petition for Parties and Make Donation Petitions. Where does the money go? Idk. Ask the Fools and the Jesters.

Kings May Abstain and Chose a Representative.

Jester Plus 14 Fools May Abstain the Abstained and Reject and Retire a Abstaining Representative.

Chaotic Court Rules. When 1/3rd of more of 2nd and 3rd ring have been removed. Kings must steer organization into Safer Harbors.

Safer Harbors. As it sounds. Elections must be held and roles filled. Mob Reap resets at twice the length to fill roles.

Jesus Christ Protects. Some members of the 2nd and 3rd ring and Kings Representatives may be voted to stay regardless of storms of Kings.

All Rules when used must be publicly and privately announced. To both the media and the private circles in trust among the Governing Council.

Body Attacks:

1st ring takes saved money to persue the attacker

2nd ring actively must sniff out bad actors.

3rd ring must talk about how bad actors may abuse the network and network actors.

All rings must rally against hackers and expose to reclaim stolen funds at any time. Rewards are proportional to the work done to reclaim stolen funds.
